Subject: GMO declaration

Dear Mr. Lanneau,

Royal Nedalco B.V. subscribes the legislation concerning approval process of GMO's completely; therefore we comply with all legislation in all countries we operate in.

The production process of Nedalco comprises a fermentation process converting sugars to ethanol which is purified by means of multiple distillation and rectification process steps.

For the production of alcohol we use beet molasses and cane molasses. As far as we know there are no commercially cultivated GMO races of either sugar cane or sugar beet.

For grain alcohol we use European Wheat. Within the EU there are no commercially cultivated wheat varieties as far as we know.

All of our suppliers of raw materials guarantee delivery of Non-GMO raw materials.

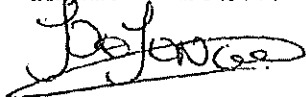

With respect to the possibility of cross contamination during transport we can guarantee that the cleaning procedures and truck inspection procedures are very stringent and are incorporated in our quality system and in the quality systems of our transport suppliers.

As a consequence, according to European directive 1829/2003 on genetically modified Food and Feed, and European directive 1830/2003 on labeling and traceability of GMO's in the Food and Feed chains, there is no obligation to label products derived from our alcohol ingredients as GMO-derived or GMO containing Foods.

If the situation should change, we will inform you immediately.

Yours Faithfully,

Royal Nedalco B.V.
